AJ

SUMMARY

I am a dedicated QA/Test Automation Engineer with over 3 years of experience in manual and automated testing. My expertise includes using Selenium, Cypress, and API testing tools to enhance software quality. I take pride in improving test coverage and boosting automation efficiency, ensuring our products meet the highest standards of performance.

EXPERIENCE

QA/Test Automation Engineer

Tech Innovations Inc.

📅 09/2021 - Present 📍 City, State

A leading tech company specializing in software solutions and automation tools.

- Developed and executed automated test scripts using Selenium and Java, significantly reducing testing time.
- Collaborated with developers in the Agile team using Jira for defect tracking and test case management.
- Improved test coverage from 60% to 90% by implementing automated tests for new features.

Test Automation Engineer

Software Solutions Co.

📅 06/2020 - 08/2021 📍 City, State

A software development firm providing custom engineering solutions.

- Utilized Cypress and JUnit to enhance user interface testing for web applications.
- Integrated API testing using Postman into CI/CD pipelines, improving deployment quality.
- Served as a mentor for junior testers, providing guidance on automation best practices.

EDUCATION

Bachelor of Science in Computer Science

State University

📅 08/2016 - 05/2020 📍 City, State

English

Native

STRENGTHS

Problem-Solving Skills

Strong problem-solving abilities, particularly in identifying issues early in the development cycle.

Communication Skills

Excellent communication skills, capable of articulating complex technical concepts to non-technical stakeholders.

Attention to Detail

Detail-oriented mindset ensuring thorough testing and quality assurance.

KEY ACHIEVEMENTS

Defect Leakage Reduction

Achieved a 30% reduction in defect leakage after implementing robust automated testing practices.

Improved Automation Efficiency

Increased automation efficiency by creating reusable test scripts, cutting down overall testing time by 25%.
